

## Changes for Website:

- Remove the page 'key to fine dining' + sushi image completely.

## About Us – this should be at the top:

**Bravo! Restaurant** is a trendy casual dining restaurant set on the serene waterfront of **Eden Island**. We offer a vibrant yet relaxed dining atmosphere where fresh flavors, handcrafted dishes, and stunning marina views come together. Our versatile menu blends authentic Creole cuisine with carefully curated international favorites, ensuring something for every craving. Bravo! is the perfect waterfront restaurant in Seychelles to unwind, indulge, and savor an unforgettable island dining experience.

## Our History

On 13th February 2010, **Bravo! Restaurant** opened its doors with a clear vision — to create a vibrant waterfront destination where great food, genuine connections, and island living come together. More than just a restaurant, Bravo! is a celebration of flavor, community, and the true spirit of Seychelles.

## Chef's Word

Head Chef Berard, known simply as "Chef" to his team, has been part of **Bravo! Restaurant** since the very beginning. Born and raised in **Seychelles**, he later spent six years in Canada refining his culinary training and sharpening his craft.

Chef's philosophy is rooted in a simple belief: exceptional food begins with the finest ingredients and a true passion for culinary excellence. Each dish is thoughtfully prepared to tell a story... Every flavor carefully balanced and every plate crafted with purpose. Our aim is always to deliver an authentic waterfront dining experience in Seychelles that lingers in your memory long after the last bite.

- View Menu
  - o Menu should not open a new page/tab. When clicked 'view menu', a pop-up should appear with an 'X' to close for ease. I like how it displays, so we can keep that, but IMPORTANT it just opens as a pop-up so someone can browse through and close it at their convenience BUT still remain on the site.

- **Menu Highlights**

- remove the 'from morning coffee to weekend brunch'.
- We can leave the images there - it looks good. I will choose which images to go there + description of the images. these images should be clickable to open and browse through, but again it should NOT open a new tab/page. it should just be a pop-up with the 'X' to close and still remain on the site.

**Important to note: This client doesn't like too much or too complicated... everything should be seamless and easy to use/navigate. The slightest bit of unease/complexity will not be accepted.**
